

A Note From Jean

When you download your Dental theme, please take the time to look and see what is included. There are items that need to be printed, laminated and will last for years. When doing this theme again next year, you will be prepared and this download will help eliminate waste.

Included on the following sheets is a blank calendar for the week to print up. (There are enough sheets to go more than 1 week, so if you add another week – just print up an additional calendar for that week). Write here each day what you did, so you have a record and to make it easier when printing up sheets for the following day. There is also a weekly planner. Use accordingly.

I have also included a pre-planned lesson plan. Follow this if you want help in what to cover and do each day.

Have Fun!
Jean 😊
